Re: Petition for Rulemaking - GN 17-183

Dear Chairman Pai:

I urge you to act swiftly regarding efficient use of the midband spectrum. Many specialized firms are attempting to defray the obvious benefits to the American people regarding timely action on GN 17-183. They are exaggerating the negative impact it would have on the American business climate and citizens. The early action will allow our great country to become the leader in 5G technology deployment. Special interests in the RF space must not override what the American people deserve. Business cannot effectively plan without clear and strong indications that the FCC will allow rapid deployment and re-organization needed to expand into prime C-band frequencies.

Please allow Americans to reap the benefits of this proposed policy, while there is still a chance to take a substantial lead in the 5G market.

Respectfully submitted,

/s/ Kevin McMorow
